He has directed a number of short films under the Scared-E-Cat banner, and can often be found lending a hand on the set of many Las Vegas independent films.

She began her passion for acting in the sixth grade, and it continues to this day. Graduating from Vo-Tech high school in 2001 with a major in TV productions, and UNLV in 2006 with a minor in Theatre, Ronni fell in love with stage. "The adrenalin rush you get from the audience is magical" she said. Even through all of this, she's kept a constant love for making movies, being on sets, and living the character.

### **Janell Kelley – "*Terra*"**

Janell loves the film industry and making movies. She has been performing since she was a child in one way or another, in groups and by herself, and thus developed a love for acting at an early age. Having performed in stage productions, the immediate response from the audience had her hooked. That love has brought her to a love of film as well: "while the response is not immediate it is still there and being able to affect people and get their response from that is something that can not be replaced" she said.
